Endpoint / Behavior	Input / Condition	Expected Result
GET /_internal/health	No condition	200 OK, service healthy
POST /auth/register	Valid customer registration	201 Created, user created
POST /auth/register	Valid rider registration	201 Created, user created
POST /auth/register	Valid restaurant-owner registration	201 Created, user created
POST /auth/register	Missing name field	400 Bad Request
POST /auth/register	Missing email field	400 Bad Request
POST /auth/register	Missing password field	400 Bad Request
POST /auth/register	Missing role field	400 Bad Request
POST /auth/register	Missing two fields (e.g. name+email)	400 Bad Request
POST /auth/register	Missing all fields / empty body	400 Bad Request
POST /auth/register	nvalid role (e.g. admin)	400 Bad Request
POST /auth/register	Duplicate email (customer)	409 Conflict
POST /auth/register	Duplicate email (rider)	409 Conflict
POST /auth/register	Password length = 5 chars (boundary)	400 Bad Request
POST /auth/register	Password length = 4 / 3 / 2 / 1 chars	400 Bad Request
POST /auth/register	Password empty (0 chars)	400 Bad Request
POST /auth/login	Correct credentials	200 OK, JWT returned
POST /auth/login	Missing email	400 Bad Request
POST /auth/login	Missing password	400 Bad Request
POST /auth/login	Never-registered email	401 Unauthorized
POST /auth/login	Uppercase version of a registered email	401 Unauthorized
POST /auth/login	Malformed email format	401 Unauthorized
POST /auth/login	Whitespace around a registered email	401 Unauthorized
POST /auth/login	Totally wrong password	401 Unauthorized
POST /auth/login	Correct password with wrong case	401 Unauthorized
POST /auth/login	Cross-account password (valid password, wrong account)	401 Unauthorized
POST /auth/login	Injection-style password (security check)	401 Unauthorized
GET /restaurants	Valid JWT	200 OK, sorted list
GET /restaurants	No token	200 OK, default list
GET /restaurants?sort_by=asc|desc	Valid sort_by value	400 Bad Request
GET /restaurants	No sort_by param at all (baseline)	400 Bad Request
GET /restaurants?sort_by=sideways	Invalid sort_by value	400 Bad Request
GET /restaurants?sort_by=	Empty sort_by value	400 Bad Request
GET /restaurants?sort_by=123	Numeric sort_by value	400 Bad Request
GET /restaurants?sort_by=asc,desc	Comma-separated sort_by values	400 Bad Request
GET /restaurants?sort_by=asc&sort_	Duplicate sort_by params	400 Bad Request
GET /restaurants?sort_by=ASC	Uppercase sort_by value	400 Bad Request
GET /restaurants?filter_field=X&filter_value=Y	Valid filterable field (isOpen, name, address, id, ownerId, createdAt)	200 OK, filtered list
GET /restaurants?filter_field=password&filter_value=x	Invalid/non-filterable field	400 Bad Request
GET /restaurants?name=...&sort_by=...&filter_field=...&filter_value=...	Combined valid query params	200 OK
GET /restaurants/:id	Valid id, valid token	200 OK, restaurant returned
GET /restaurants/:id	No token	401 Unauthorized
GET /restaurants/:id	Random, well-formed UUID not in DB	404 Not Found
GET /restaurants/:id	Malformed / non-UUID id	404 Not Found
GET /restaurants/:id	Valid UUID belonging to a different entity type	404 Not Found
GET /restaurants/:id	Existing UUID in uppercase	404 Not Found
GET /restaurants/:id	Numeric-only id	404 Not Found
GET /restaurants/:id	Injection-style id (e.g. ' OR '1'='1)	404 Not Found
GET /restaurants/	Trailing slash, no id	200 OK, routes to list endpoint
POST /restaurants	Valid token, role restaurant, valid name & address	201 Created
POST /restaurants	No token	401 Unauthorized
POST /restaurants	Wrong role (not restaurant)	403 Forbidden

POST /restaurants	Missing name	400 Bad Request
POST /restaurants	Missing address	400 Bad Request
PATCH /restaurants/:id	Update name, address & status together	200 OK
PATCH /restaurants/:id	Update only name	200 OK
PATCH /restaurants/:id	Update only address	200 OK
PATCH /restaurants/:id	Update only status	200 OK
PATCH /restaurants/:id	No token	401 Unauthorized
PATCH /restaurants/:id	Not found (random UUID)	404 Not Found
PATCH /restaurants/:id	Not found (malformed/non-UUID id)	404 Not Found
PATCH /restaurants/:id	Not found (valid UUID belonging to a different entity)	404 Not Found
PATCH /restaurants/:id	Non-owner attempts to update a restaurant they don't own	403 Forbidden
